

Supply chain due diligence

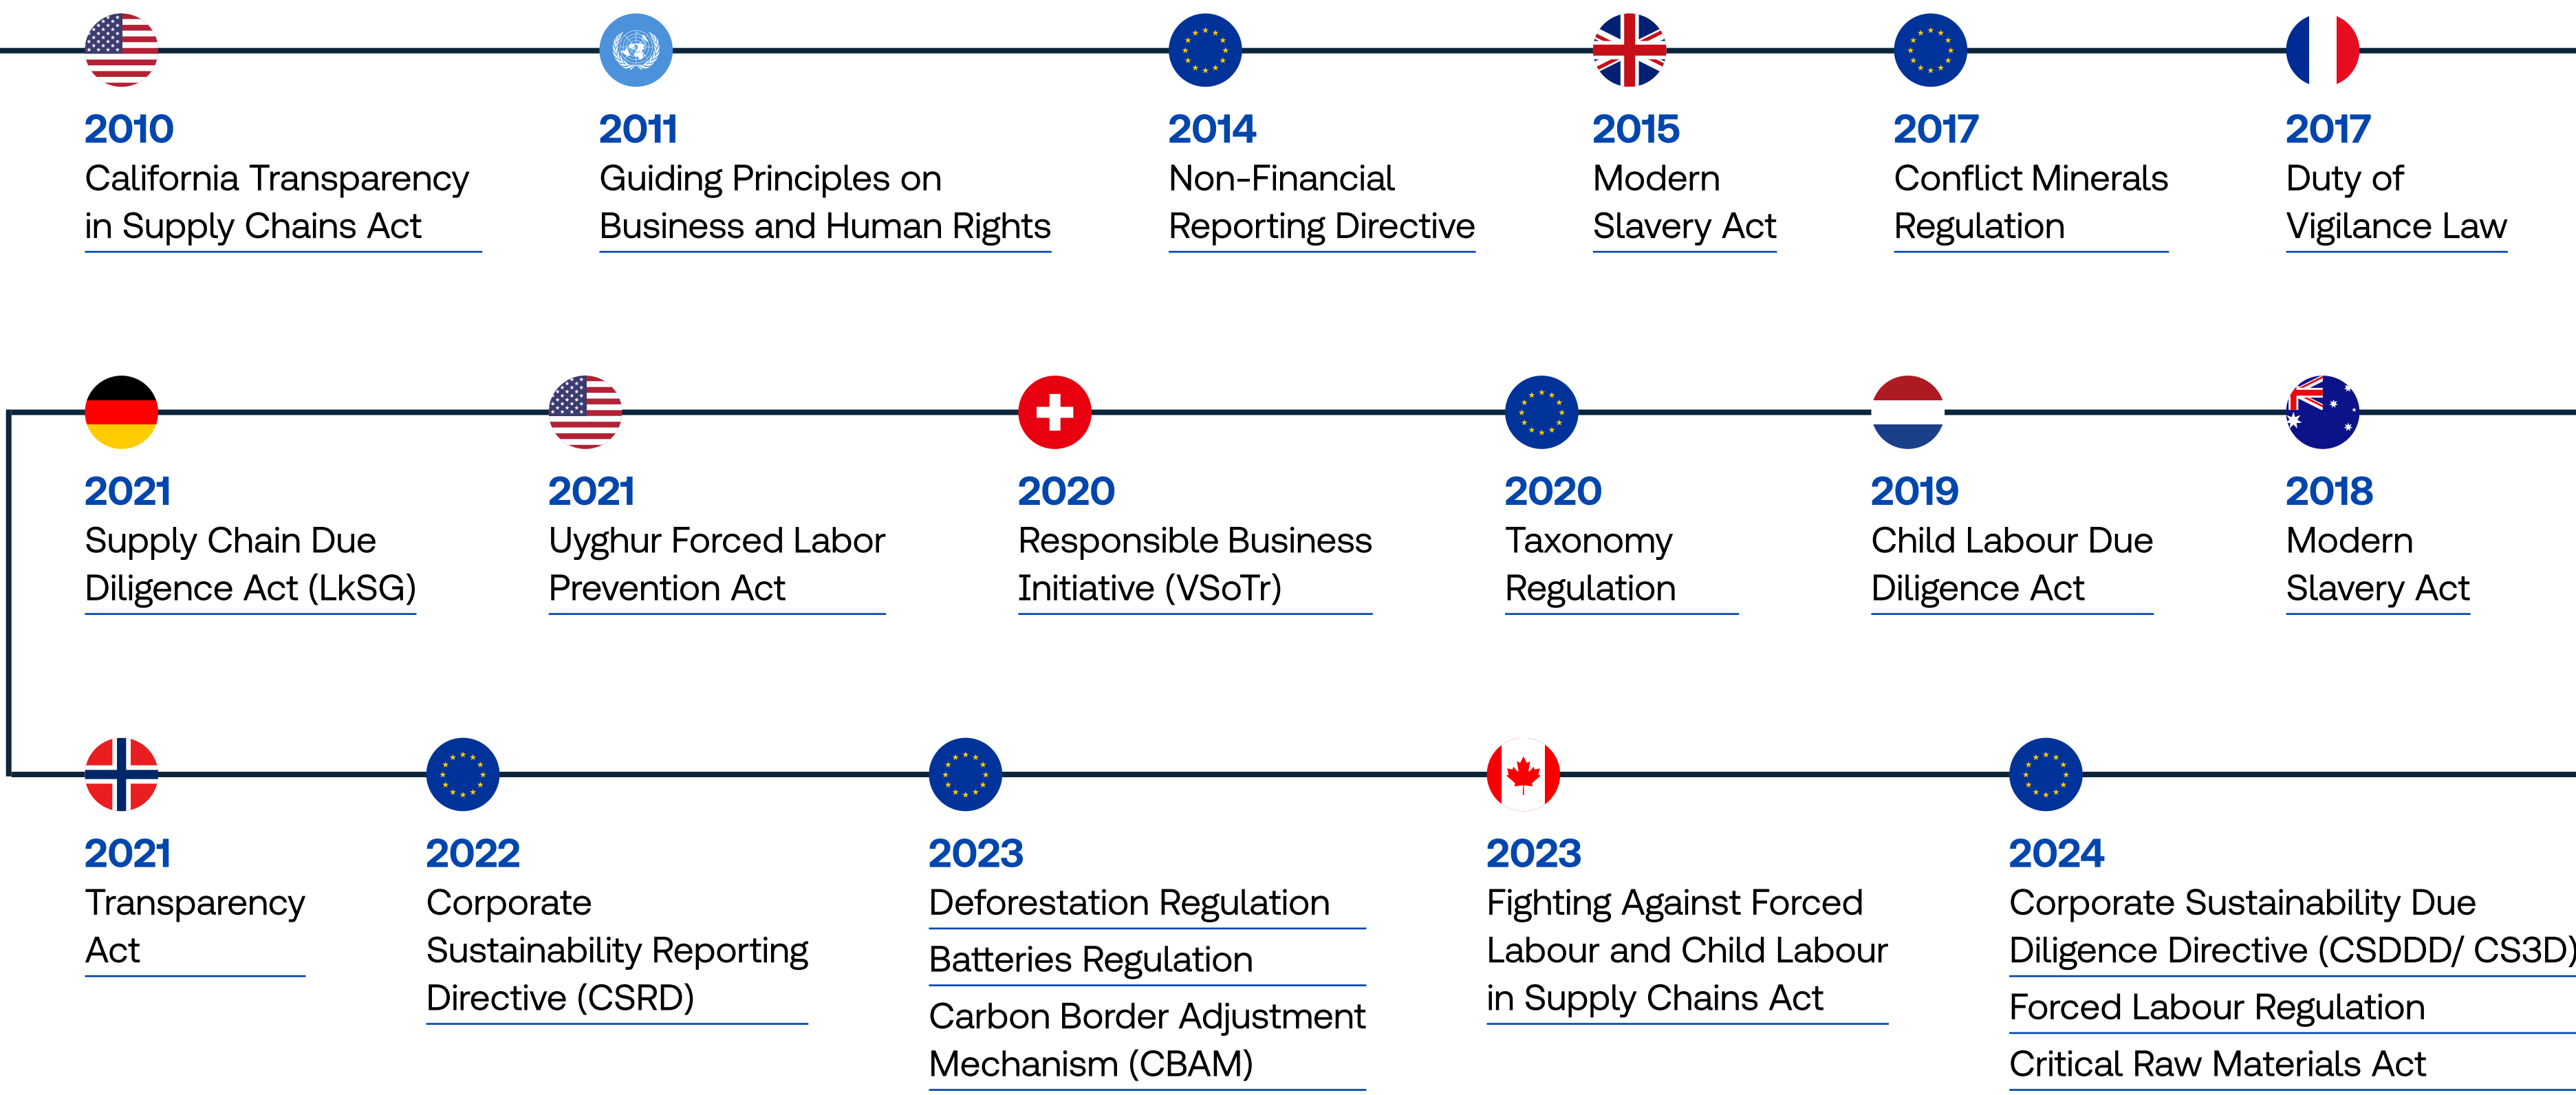

Value chain sustainability services

There is growing global regulatory pressure for companies to manage supply chain risks effectively. Increasing demand for the verification of ESG (Environmental, Social, Governance) compliance means you must ensure transparency and accountability across the value chain. Proactive supply chain due diligence ensures your suppliers are following effective ESG practices – critical for avoiding non-compliance penalties and reputational risks.

Global evolution of supply chain due diligence acts

The number of due diligence regulations is increasing across the world

How do you prove due diligence compliance?

Strategy & Governance

- Establish policies and procedures
- Train personnel
- Secure top management commitment
- Ensure traceability across the value chain

Risk Assessment

- Regularly update risk analysis
- Prioritise impacts and develop action plans
- Engage stakeholders and implement a grievance mechanism

Measures

- Secure contractual assurance
- Implement preventive and mitigation measures
- Remediate adverse impacts

Reporting

- Collect data and monitor KPIs
- Evaluate performance against goals
- Report to stakeholders
- Third party verification of due diligence practices and assurance of sustainability disclosures

How TÜV SÜD supports due diligence compliance
