

IECEE CB scheme

Your access to global markets in a single step with our CB certification

Who is the IECEE CB scheme for?

The IECEE CB scheme is for manufacturers who would like to have a smooth process for their electrical products to be exported all over the world.

What is the IECEE CB scheme?

The IEC (International Electrotechnical Commission) System for Conformity Assessment Schemes for Electrotechnical Equipment and Components (IECEE) Certification Body (CB) Scheme is an international system for the mutual acceptance of product safety test reports and certificates for electrical and electronic equipment, devices, and components.

What are the benefits of IECEE CB scheme?

- 

A multilateral certification system based on IEC standards

Accessed and accepted across international markets
- 

International network of product certification organisations

More than 50 countries across Africa, Asia, Australia, Europe, North and South America
- 

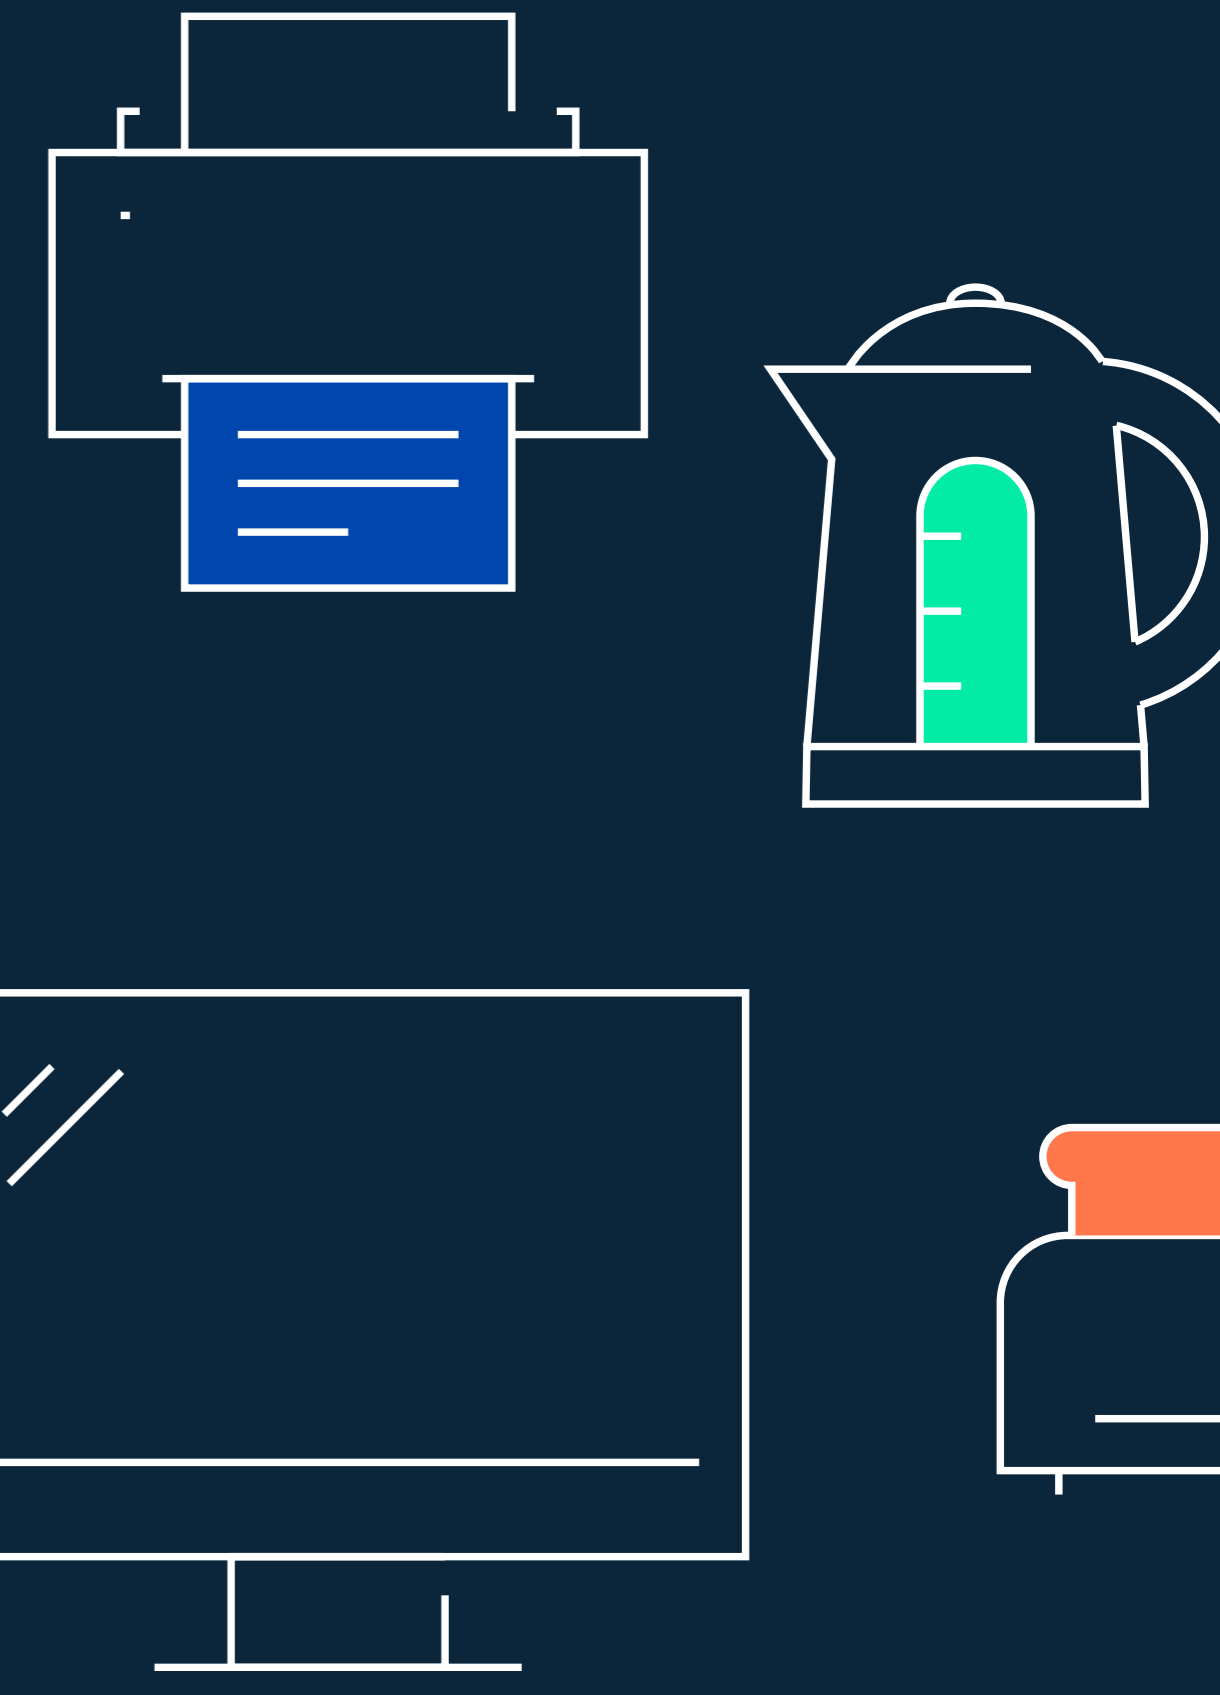

Manufacturers can access every CB Scheme member country

Avoid expensive duplicate testing

What does CB scheme certification involve?

Three simple steps:

- The manufacturer applies to a National Certification Body (NCB), such as TÜV SÜD, for a CB test certificate.
- The NCB works with authorised CB testing laboratories (CBTLs) to determine if the product satisfies IECEE requirements.
- CBTL issues a CB test report and NCB issues a CB test certificate to the manufacturer, if the product complies.

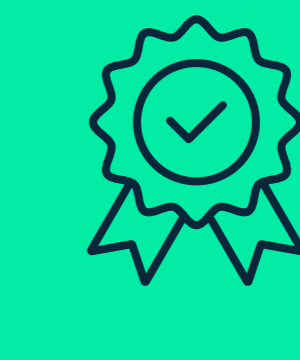

Why choose TÜV SÜD for CB scheme certification?

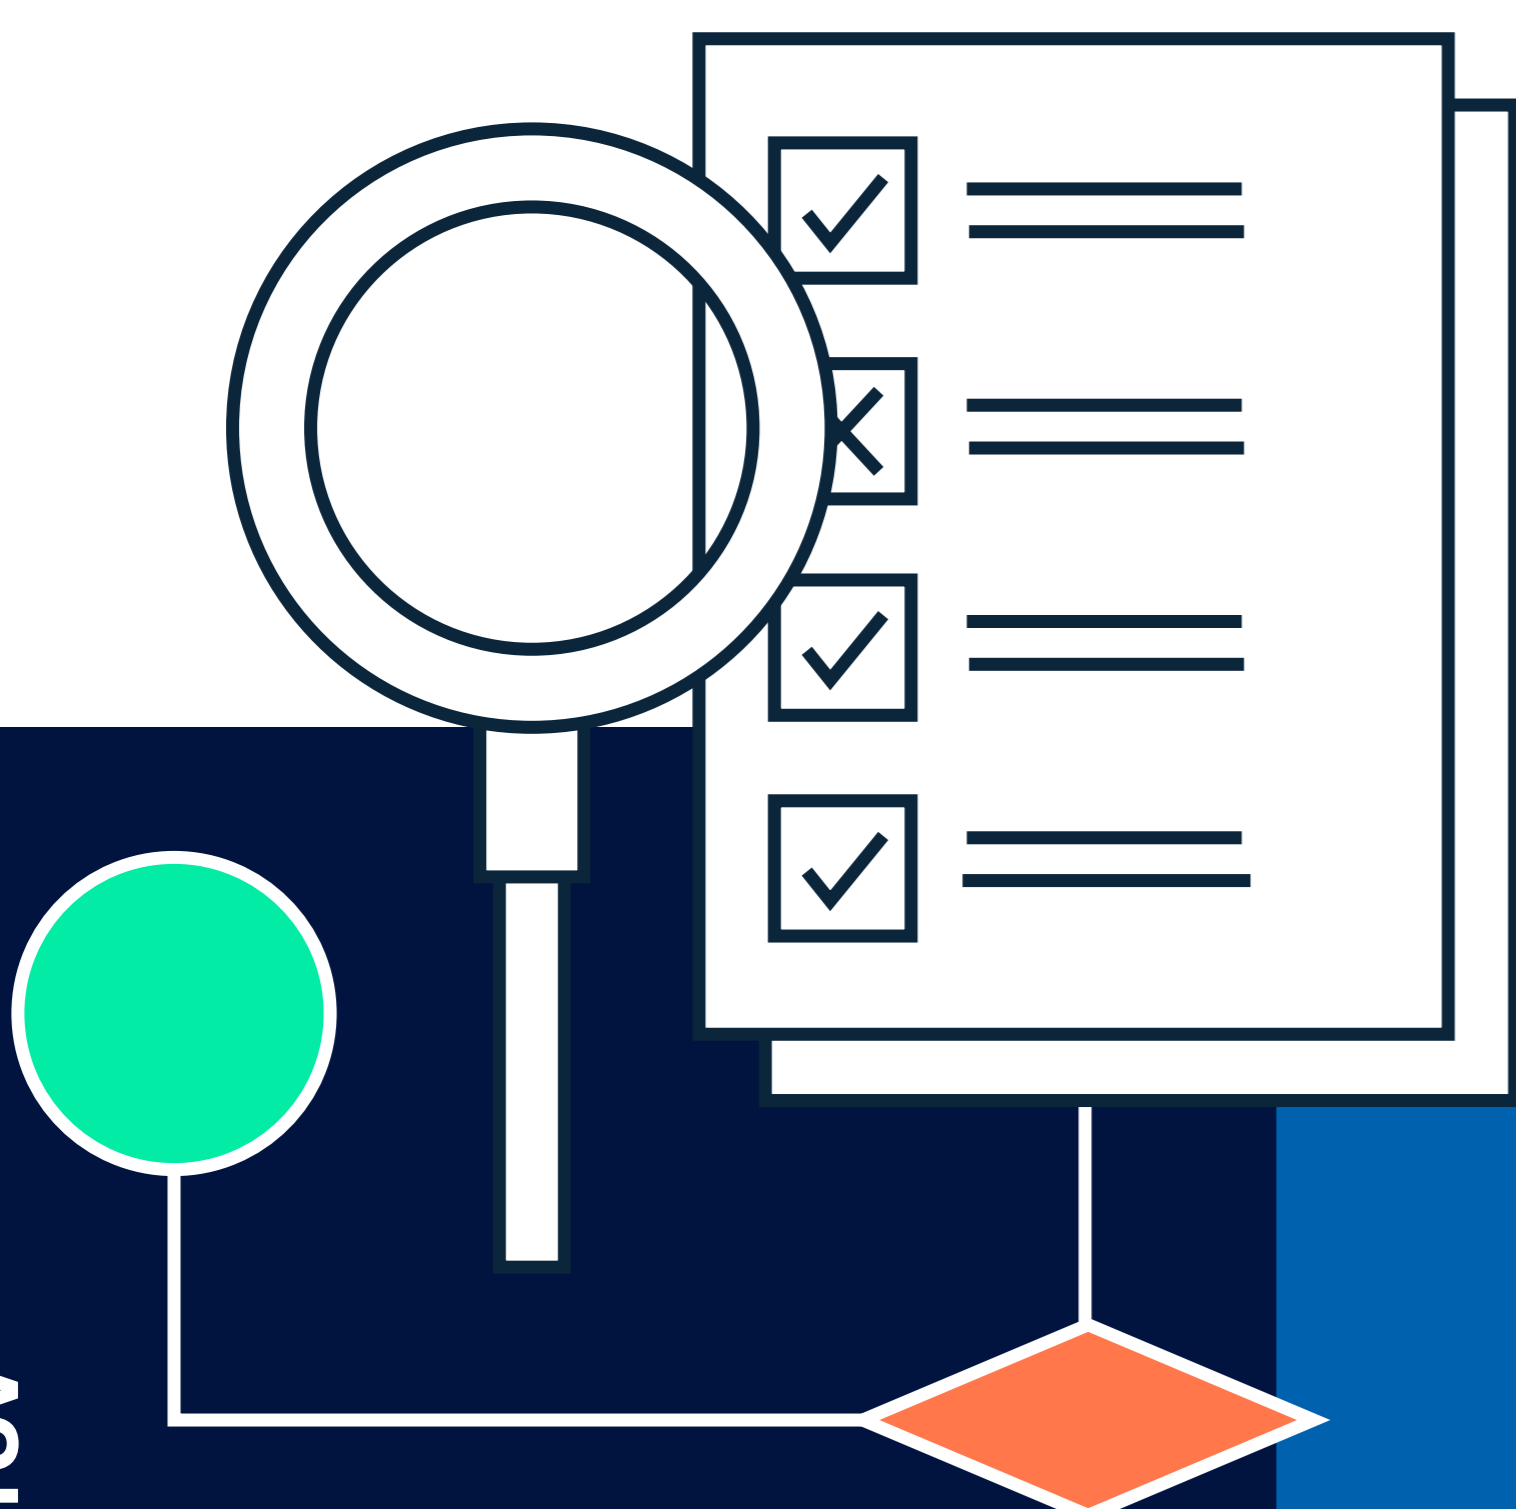

- 

Our global network means there will always be a laboratory near you
- 

We have two NCBs and many CBTLs under the CB Scheme
- 

Our experts understand local market requirements on a global scale
- 

Our quality and safety expertise will help you achieve product approval quickly

Choose TÜV SÜD's IECEE CB scheme certification for your electrical products overseas.

Add value. Inspire trust.
