

<h1>Policy</h1> <h2>Carbon Management Service</h2>		 South Asia
IS-CMS-MG-Policy	Certification Body "Environment and Energy"	

Carbon Management is an important part of the global player TÜV SÜD and its worldwide structures and competences. CMS operates worldwide, with its central office in Pune, India. The Carbon Management Service is a part of the Environmental Technology (ET) Department of TÜV SÜD South Asia. TÜV SÜD commits to adopt the vision and the corporate policy as described in the "Industry Services-Quality and Operational Manual" including all mentioned statements and cross references of TÜV SÜD "Choose certainty. Add value". The frame of our daily work is the "TÜV SÜD Code of Ethics" which defines the handling of principles among each other and with clients.

ET commits to adopt the requirements of ISO9001: 2015 standard (except for Clause 8.5.1f Validation of processes for production and service provision, for all the services are verified subsequently). Our services and our overall vision are a contribution to a better future of the world. ET offers high quality third-party services in the field of climate change. In addition to the technical expertise in almost all fields, we emphasize our auditors' social and intercultural competence. The ET is a neutral, technically high-qualified, multidisciplinary third-party for greenhouse gas mitigation measures and activities. ET offers services such as validation /verification and certification of climate change projects, GHG inventories, environmental testing, for private and public clients of all industrial sectors as well as carbon footprint projects. These services are carried out in compliance with all relevant standards and legal regulations as well as respective national laws, proven by our quality mark "TÜV Octagon". ET conducts its assessments independently and impartially, in a credible, non-discriminatory and transparent manner. To maintain and guarantee impartiality in all steps of any assessment, procedures are implemented and continuously supervised to assure this policy. Any conflicts of interest and impartiality must be addressed to the management immediately. Every member of the department is very conscious of the challenges of climate change and the effect that it has on our planet and civilization. Furthermore, ET has an accredited scope of business for climate change projects from the UNFCCC and has other accreditations for related schemes. The management commits to develop, implement and support the QMS. By working in various team combinations, participating in internal and external trainings supported by a permanent monitoring of the performance of our auditors, the continuous improvement of our work is guaranteed. A permanent exchange of information on the most recent developments in each field is acquired and implemented. The Quality Management System of CMS will be in line with the requirements as specified in the "Quality Manual- Climate Change Projects". The technical expertise of our staff - in combination with the quality documents - comprises the basis of our work. ET uses the expertise of trained and qualified TÜV SÜD auditors, completed by external specialists. To ensure our auditors' up-to-date knowledge, they must undergo trainings on a regular basis. Our services endorse the global endeavors for climate protection and a sustainable energy generation – both being 21st century aspects of environmental and energy policy. The implementation and compliance of the policy will be checked annually by the Management Review.
