

Construction Supply Chain Audits

All contractors big or small are dependent on their supply chains to deliver successful projects for their clients. Being reliant on subcontractors, plant and material suppliers adds complexity and introduces risk into the construction process. Your supply chain is only as good as its weakest link.

Poor performance from one member of the supply chain can have a detrimental impact on project outcomes. With construction margins wafer thin there is no room for error. TÜV SÜD, one of the world's leading compliance specialists have now developed a robust audit process that mitigates against supply chain risks.

Giving you complete confidence in your supply chain

Inspire trust.**

The Optimal Solution

Our Construction Supply Chain Audits are designed to ensure that clients and contractors can have confidence that their projects are in safe hands and will be delivered successfully, in accordance with quality standards and all legislation. Any weakness in the supply chain will have a detrimental impact on project outcomes, sometimes with catastrophic consequences.

Our technical experts will conduct a comprehensive audit of your supply chain to ensure they have the competence and capacity to deliver results. Our audits are evidence based and cover the technical standing, health, safety and wellbeing, quality, and sustainability capability of your suppliers. We also ensure they comply with all relevant international and regional regulation and legislation.

At the end of our assessment you will receive a comprehensive report, which identifies areas of concern and makes pragmatic recommendations for improvement. The TÜV SÜD stamp of approval will give your clients confidence in your ability to deliver and will clarify your expectations of your supply chain.

Quickly identify weakness in your supply chain and take corrective action

Reduce the risk of poor performance

Independent 3rd party verification gives you and your clients confidence

Effectively communicate your standards and expectations

Ensure your operations remain compliant
