**SITE (SIGOS Integrated Test Environment)**

SITE is an automated end-to-end test system for telecommunication networks. SITE is available as both on premises (SITE on Premises) or as cloud hosted (SITE in Cloud). The system actively simulates subscribers on various interfaces. The main purpose of the SITE tests is to measure the network's behaviour from an end user's perspective. SITE provides a flexible and reliable Revenue Assurance solution comprising CDR generation, CDR comparison, and tariff modelling. SITE measures ETSI KPIs to the requirements of ETSI TS 102 250-2 Speech and Multimedia Transmission Quality (STQ)

This certifies that the above product has been found to comply with the specified standard.
