

Ultrasonic Meter (USM) Measurement Timeline – 1995 - 2025

National Engineering Laboratory

FUNDED BY BEIS

Impacts

National Engineering Laboratory has been central to the development of USM flow measurement standards over the last 30 years

National Engineering Laboratory has done extensive development work enabling the use of the USM's in the oil & gas arena through creation of understanding and development of guides to reliable usage

National Engineering Laboratory is supporting the clean fuels agenda by the study of USM's to LNG
