

Gain A Competitive Edge in Restarting Your Business with a Hygiene Audit

The safety and health of employees and customers has always been important to most companies, but with the COVID-19 pandemic, effective safety and hygiene measures have become vital to protect employees and customers alike. Proper risk mitigation and establishment of a high level of trust are crucial for organizations. Implementing a comprehensive Hygiene Audit shows outward commitment to the safety and well-being of your communities.

Key Steps to Follow:

Assign Experienced and Qualified Auditors

TÜV SÜD's certified professionals will support your ramp-up phase by carrying out COVID-19 Hygiene Audits at your business. Our experts assess the hygiene status of your business based on an extensive list of criteria including:

- Measures related to customer contact and safety distances
- Cleaning and disinfection of sanitary facilities and common rooms
- Workplace design
- Personal protective equipment & staffing
- Employee training
- Handling of suspected infection cases

Assess Your Business

We provide a thorough understanding of relevant hygiene requirements, and the impact of implemented hygiene and safety measures. We will help you to ensure compliance with all applicable safety standards.

Receive Audit Report

Upon completion of the hygiene audit, we will send you a TÜV SÜD audit report with an overview of your company's hygiene status.

You will also receive an action list with opportunities for improvement identified by our auditors, which you can use for independent improvement of your hygiene status.

TÜV SÜD is Your Trusted Expert for Hygiene Audits

TÜV SÜD provides services to master the restart of your business and to cope with the new normal. With our in-depth knowledge of the industry and profound expertise in the field of certification, we can help you effectively reduce risk, ensure compliance, and create trust.
