

Five steps to TISAX® Certification

The Trusted Information Security Assessment Exchange (TISAX) is an online platform designed to support cross-company recognition of information security assessments. Members of the German Association of the Automotive Industry (VDA) are required to obtain TISAX® certification. Other automotive OEMs tend to favor suppliers and partners who participate.

1

Read TISAX Participant Handbook

First, you must understand the scope required for your organization. Available on www.enx.com, this document will help you understand the:

- Registration process
- Assessment process
- Assessment report
- TISAX labeling requirements
- Exchange platform

2

Online Registration for TISAX

Now you can register for TISAX on www.enx.com. To speed up the online registration process, you should determine the assessment level (1-3) that your company will require and identify whether you need a multi-site or simplified assessment beforehand. The review is completed 2-3 weeks after submittal.

3

Audit Preparation

You must complete a self-assessment first. To minimize wait times, select a third-party audit provider as early as possible.

4

Third-Party Assessment

The audit can either require a documentation-based plausibility check (Assessment Level 2), or a more comprehensive on-site-inspection (Assessment Level 3). Upon completion of the successful audit, the auditor uploads the final report to your TISAX platform, including your company's TISAX-label. With your approval, OEMs and other partners can then access your TISAX status, thereby attaining a third-party confirmation of your security efforts.

5

Issue of TISAX labels

Following a successful assessment, your organization is eligible to receive the TISAX label.

TÜV SÜD is approved by ENX to perform TISAX assessments and to issue the respective report and label. Select TÜV SÜD as an auditor when you register as a participant on the [TISAX platform](http://www.enx.com). The results of such assessments are valid for three years and will can be shared with other TISAX participants.
