Why Unbundled?

Benefits to Going Unbundled

What is Unbundled?

TÜV SÜD Global Risk Consultants (GRC) initiated the concept of “unbundled” risk control programs as an alternative to traditional bundled programs. Recognizing that a client can benefit from a long-standing partnership with a property loss control consultant, TÜV SÜD GRC dedicated resources to gaining valuable knowledge over time about each company, its properties, and its loss prevention needs.

Traditional bundled loss control programs are dependent on insurance companies to evaluate risk and provide loss control. While many of these are excellent, each time a company changes carriers they need to start the education process all over again.

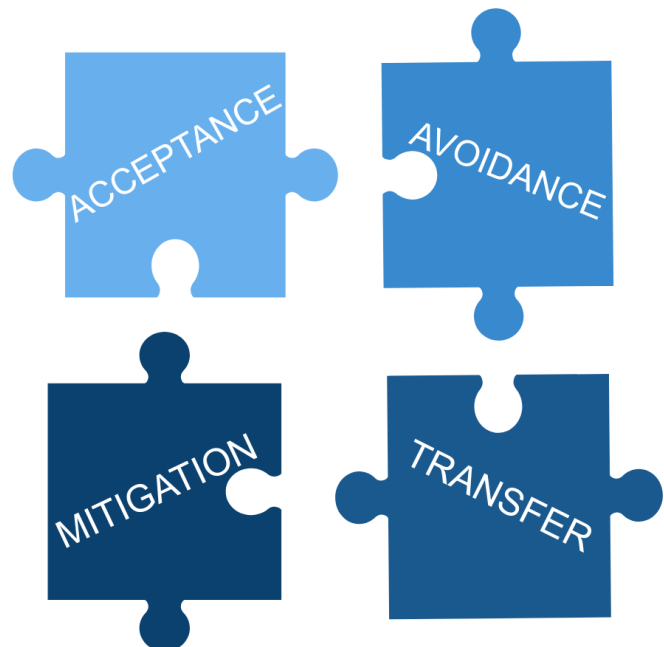

As an independent, full-service risk control firm, TÜV SÜD GRC is your constant, committed advisor. By partnering with us the knowledge base builds each year, so even if a company changes insurance carriers they will continue to receive the most accurate, detailed risk analysis possible. Focused on managing your risks to reduce loss, TÜV SÜD GRC helps you make sound business decisions.

Six Benefits to Going Unbundled

- Industry knowledge
- Ability to “think outside the box”
- Continuity of service
- Client driven, long-term relationships
- Increased control & ownership of information
- Worldwide credibility with underwriters

Four Elements to Manage Risks

With risk control engineers and consultants worldwide, TÜV SÜD GRC is the leader in unbundled property loss prevention solutions, providing value-added services to clients around the globe.
