Introduction to VDA ISA and TISAX®

Your training at
TÜV SÜD Academy

Course description

For companies to cooperate effortlessly, they rely on exchanging information, such as contract data or personal details of the contact partner – i.e. sensitive data that must not be made accessible to everyone.

Numerous automotive manufacturers from all over the world require a TISAX® label from their suppliers and service providers for the purposes of collaboration. This outlines the information security requirements in the automotive industry and serves as a guarantee that information can be exchanged securely. In this self-paced online training course, we provide you with an initial overview of the VDA ISA industry standard and the TISAX® assessment and exchange mechanism.

Who will benefit?

This e-learning course is specially designed for

- Managers
- Management representatives
- Specialists

Course contents

- General information on TISAX®
