Electrically skilled person – refresher course

Your Training at
TÜV SÜD Akademie

Course Description

To prevent hazards, electrically skilled persons should regularly update their knowledge and skills and stay informed about accident prevention regulations and provisions. This e-learning course allows you, as an electrically skilled person, to complete this regular training conveniently and flexibly online, through the annual mandatory instruction according to DGUV regulation 1.

Who should attend

Electrically skilled persons in trade and industrial companies

Course Objective

- With this e-learning, you can update your knowledge about potential hazards as well as about standards and regulations.
- You can reduce the risk of accidents in your company.
- Your company can benefit from a fault-free operating process.

Course Contents

- Electrical hazards
- Network systems and protection against electric shock
- Operating electrical installations
- Conduct in the event of electrical accidents
- Work activity on cabinets
- Responsibility and expertise

Methodology

The e-learning course consists of several chapters, which each contain different flash cards. The advantages of flash cards are:

- You always have an overview of the topics
- You can navigate easily between topics
- You can track your learning progress at all times
- You get short, self-contained snippets of knowledge

Quiz questions and interactive elements

The quiz questions ensure variety and enable regular knowledge checks. Interactive elements motivate and promote effective learning.

Certificate
