CIUDAD DE BUENOS AIRES
Wednesday October 28, 2020

Referencia: EX-2018-03100462-APN-SDYME#ENACOM – Test Protocols update

A: Guillermo Aguedo Montenegro (DNPYC#ENACOM), Pablo Hernán Salas (DNAYRT#ENACOM), Laboratorios Acreditados (Resolución CNT 700/96),

Con Copia A: Patricia Zulema Roldan (SRYH#ENACOM), Cristian Leandro Conejeros Valenzuela (ASLA#ENACOM),

Of my highest consideration:

As a result of the modifications in the allocations of the bands 915-928 MHz, 2,400-2,483.5 MHz, 5,150-5,250 MHz, 5,250-5,350 MHz, 5470-5,600 MHz, 5,650-5,750 MHz and 5,750-5,850 MHz, determined by the Resolution MM 581/2018 and Resolution ENACOM 4653/2019 and taking into account that these changes mainly affect some specifications of broadband and frequency hopping equipment, the new applicable test protocols for registration in the RAMATEL are attached:

- FHSS Systems Protocol V20.1.
- Broadband Systems Protocol V20.1

These procedures come into effect from December 1st, 2020, and will be used taking into account the scope defined in each of them.

The rest of the equipment, referred to in ENACOM Resolution 4653/2019 as *Other Systems*, will continue to be tested under the ENACOM-Q2-60.14 Technical Standard.

Since the modifications do not affect the accreditations granted in a timely manner, the authorized laboratories will apply the new procedures automatically.

Once the aforementioned protocols come into force, for new registrations in RAMATEL, applicants must submit test reports based on them.

In case of renewals, it is deemed convenient that test report submitted for the original registration is accepted, as long as compliance with the limits established in the new regulations is demonstrated.
