## GMP certification acc. to ISO 22716

Confirmation that the cosmetic has been produced in the right conditions.

### New challenges

According to Regulation (EC) No 1223/2009, manufacturers of cosmetic products are responsible for placing a safe product on the market.

One of the conditions that companies must meet is the production of a cosmetic based on the requirements of ISO 22716. Adjusting production, control and storage conditions to GMP guidelines reduces the risk of delivering products that pose a threat to human health.

### What is the ISO 22716 standard??

ISO 22716: 2009 is a tool that allows to meet legal requirements, according to which all cosmetic products must be made based on Good Manufacturing Practice for cosmetics.

ISO 22716 Good Manufacturing Practice emphasizes the quality and safety of cosmetics production as well as the control and proper storage of cosmetics.

Implementation and certification of ISO 22716: 2007 helps ensure that the cosmetic product has been manufactured, controlled and stored in an appropriate manner, which is the basis for the launch of a safe product on the market.

### Why ISO 22716 certification?

The ISO 22716 certificate is addressed to companies that want to confirm compliance with Good Manufacturing Practice requirements for the production, control, storage and dispatch of cosmetic products.

The implementation of the guidelines contained in the standard is mandatory for cosmetics companies, while the certification itself is voluntary.

The ISO 22716 certificate issued by the Accredited Certification Body is, however, the simplest and most convenient way for the manufacturer to demonstrate compliance with the obligation to meet the requirements of Good Manufacturing Practice.

### How can we help you?

TÜV SÜD employs experienced experts and auditors in the field of Good Manufacturing Practice for cosmetics who have worked in cosmetics companies.

TÜV SÜD is a global leader in certification. We will help you determine your options and minimize potential risk. Thanks to cooperation with us, you will receive confirmation of your company's adjustment to international standards.

## SIX STEPS FOR CERTIFICATION

Completing the certification questionnaire for the Certification Body to prepare an offer containing the costs and planned duration of the assessment.

1st stage of the assessment: verification of documentation related to Good Manufacturing Practice and planning of the assessment on site.

2nd stage of the assessment: visit of TÜV SÜD auditors at client's locations to assess the functioning of Good Manufacturing Practices

Sending the Assessment Report to the company.  
In case of non-compliance:  
the client introduces corrective actions.

Decision on granting certification and issuing a certificate.

Certificate sending, supervisory assessments to assess the effectiveness and functioning of ISO 22716 take place every year. After **5 years**, recertification takes place.

## Why choose TÜV SÜD?

TÜV SÜD is a global leader in the field of certification, which has currently issued over 54,000 certificates. Through many years of experience and competent auditors, we provide organizations with support and independent evaluation at every stage.

Audits carried out by our experts will provide reliable and objective information about your company, subcontractors and suppliers. With the TÜV SÜD certification mark, you can prove your commitment to providing high quality products.

## Benefits for your company:

- **Certainty of meeting the requirements** - thanks to the audit carried out by people associated with the industry for many years.
- **Save time and money** - the certificate issued by TÜV SÜD avoids additional audits ordered by the client, and very often is the basis for starting cooperation.
- **Opening the way to foreign markets.** - thanks to cooperation with TÜV SÜD, a recognized and competent organization whose certificates are acceptable in Europe and in the world
- **Knowledge and experience** - provided by experienced auditors, experts and trainers from TÜV SÜD. Auditors have experience in the cosmetics industry and work many years in the industry.
- **Increased competitiveness** - the ISO 22716 certificate issued by TÜV SÜD lowers trade barriers for your company and strengthens its position as a supplier.
