Argentina IRAM certification

Ensure that your products successfully meet Argentina's standards by working with a market leader, TÜV SÜD. TÜV SÜD fully understands the local requirements and procedures applicable in Argentina.

General information

This factsheet describes the procedure for preparation, submittal, evaluation, and certification of defined products in the mandatory scope for the certification program.

Resolution No. 508/2015 defined the specific regulatory framework for electrical products. It supersedes and replaces various previous regulations and unifies them into one regulation. On 5 July 2016, Argentina authority of the compulsory certification scheme for electrical-electronic products decided to make corrections on the Resolution S.C. N°508/2015 to increase efficiency.

With the corrections, a new regulation Resolution S.C. N°171/2016 was issued and came into force on 4 August 2016. This new regulation withdraws and replaces the abovementioned Resolution S.C. N° 508/2015.

Resolution 169/2018 and its supplementary provisions, which are the new version on essential safety requirements for low voltage products using System No. 5(Mark of conformity) or System No. 7(Lot), came into force on May 27th, 2018.

Argentina has introduced a new Electrical Safety conformity assessment framework through Resolution 237/2024. Manufacturers need to use the new conformity marking with QR code after March 2025.

Conformity certification

Certification type	Certification validity	Certification mark	Certification body
IRAM - IRAM & S Mark (System 5)	<p>The certificates remain valid if the surveillance procedure is indicated in Res. M.P. S.C. N ° 169/2018 and if there are no problems during the surveillance</p> <p>*all products will be marked with new conformity mark after March 2025.</p>		IRAM (Instituto Argentino de Normalización y Certificación)
Lot Approval (System 7)	Per lot		

Regulated products

Certification scheme	Certification validity
IRAM Mark Certification – IRAM & S Mark (System 5)	Electrical equipment to be used with a nominal input voltage, for consumer material, and / or output, for generating material, between 50 V and 1,000 V in alternating current, and between 75 V and 1,500 V in direct current.
Lot Approval (System 7)	

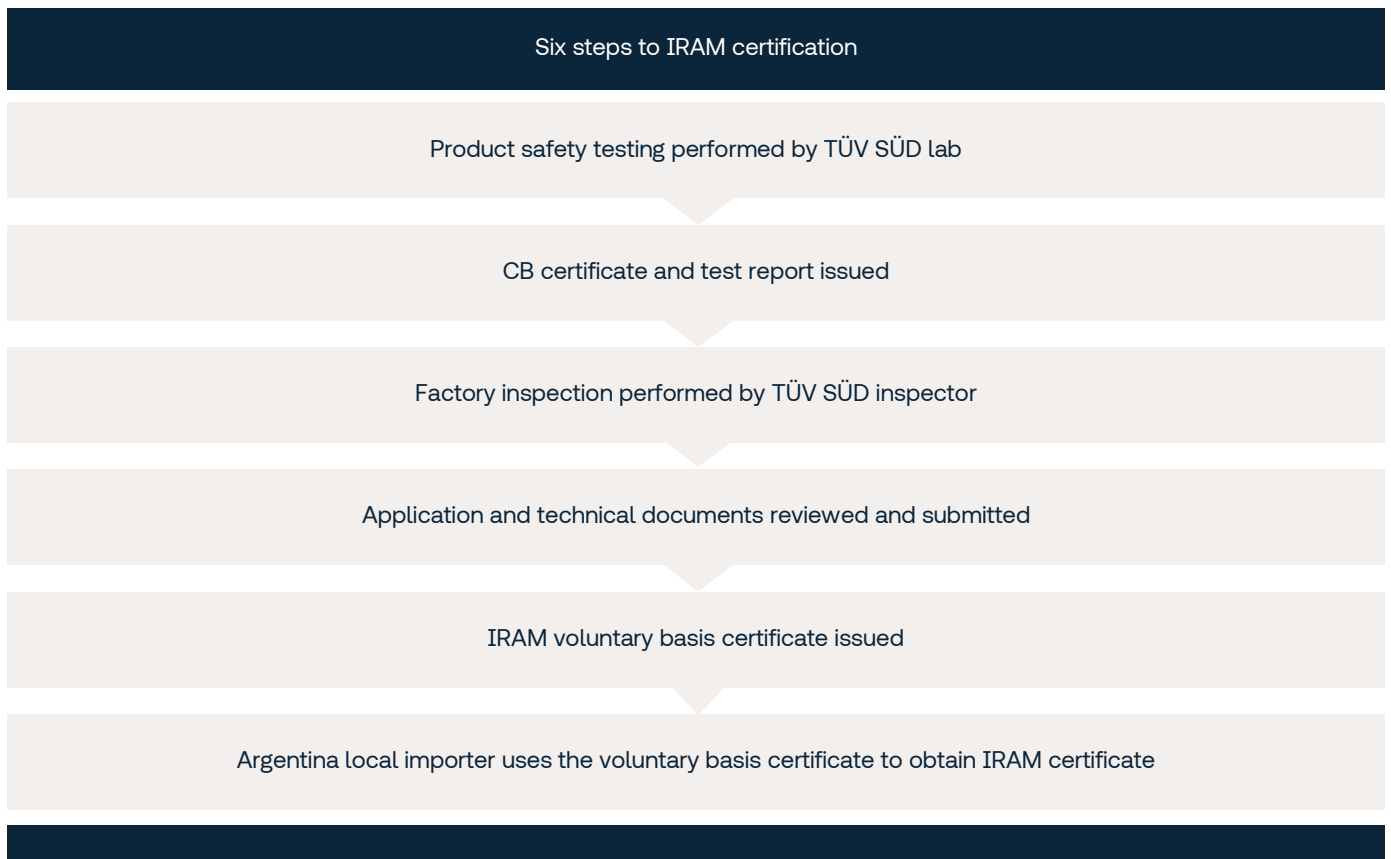

Basic country deviation

Official language	Spanish
Rated voltage	220V AC
Frequency	50Hz
Plug	<p>Class I (Standard IRAM 2073) Class II (Standard IRAM 2063) The plug, cable and coupler set shall be certified in conformance with Resolution 169/18. The supply cable shall comply with Resolution SCI 731/87.</p>
Local climate conditions	N/A
Instruction manual	Spanish
Critical component list	Electronic components, plugs and cables for electrical installation need IRAM & S-mark certificate in order to be imported and commercialised in the country.

Basic application requirements

Test report	CB certificate & test report within one year
Lab	TÜV SÜD is able to issue test report and certificate for IRAM approval
License holder	Argentina local importer
Factory inspection	Required – Mark Certification Not required – Lot Approval
Shipment inspection	Not required
Rating label	<ol style="list-style-type: none">1. Product name2. Model number3. Country of origin: (Hecho en: xxx, Origen: xxx o Made In: xxx)4. Importer name and address5. Compliance Marks6. Other product oriented information, please refer to the irrelevant IRAM standards
Maintenance requirements	Mark Certification (System 5): every 18 months after certificate issuance or after the previous surveillance activity
Additional information	Only local importers are allowed to obtain an IRAM certificate based on a voluntary certificate issued to overseas manufacturers

Application procedure

TÜV SÜD has the expertise and laboratory infrastructure to support manufacturers in obtaining the necessary approvals and compliance in accordance with Argentina's standards and requirements.

Application lead time and fee

Please contact the nearest local TÜV SÜD office for information.

Your business benefits

- **Save time and money** – by covering all your testing and certification needs through our one stop solution, as well as using our technical pre-check service to avoid retests and minimise costs.
- **Minimise risk** – from business disruption by ensuring that your products conform to a broad range of global market regulations.
- **Shorten time to market** – through TÜV SÜD's process systems and advanced knowledge of regulations.
- **Enjoy expert partnership** – with our team of highly skilled experts that possess in-depth knowledge of the latest changes and updates to global regulations and standards.

How can TÜV SÜD help you?

TÜV SÜD is one of the world's largest independent providers of testing and certification services. With our complete knowledge of local legislation, guidelines and standards, we support you in achieving compliance for your consumer and industrial products within the Argentina market.

TÜV SÜD has the experience and capability to support manufacturers in attaining compliance with Argentina regulatory requirements and obtaining the necessary approvals. TÜV SÜD has signed an MoU with IRAM for test result recognition which means customers do not need to send samples to Argentina for local testing.

With our comprehensive certification packages, we provide all the necessary services for IRAM including testing, technical evaluation, factory inspection and certification according to your needs. Please contact us for details on our current accreditation scope for IRAM certification.

Add value. Inspire trust.

TÜV SÜD is a trusted partner of choice for safety, security and sustainability solutions. It specialises in testing, certification, auditing and advisory services. Since 1866, the company has remained committed to its purpose of enabling progress by protecting people, the environment and assets from technology-related risks. Through more than 25,000 employees across over 1,000 locations, it adds value to customers and partners by enabling market access and managing risks. By anticipating technological developments and facilitating change, TÜV SÜD inspires trust in a physical and digital world to create a safer and more sustainable future.
